5

3 Indicator Description

Indicator	Status	Instructions
Red light	Blinking (on for 1s and then off for 1s)	Normal operation (not connected to the server)
	Steady on	The Smart WiLANII is connected to the server.
Green light	Blinking	Data transmission (communicated with the inverter)

7

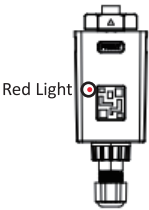

- Step 2:  
Open the APP, tap , and tap “Wifi Configuration”.

4

- Note: if you cannot perform the next step,
- 1. check whether the inverter is normally powered on;
  - 2. check whether the frequency band of WiFi is 2.4G, and do not connect to a frequency band of 5G;
  - 3. check whether the SN code is correct or contains any redundant space;
  - 4. check whether Bluetooth is on or whether FoxCloud US is allowed to access Bluetooth; and
  - 5. check whether your mobile phone is near the inverter.

- Step 4:  
Check whether the red light on the Smart WiLAN is constantly on.
